

WS19: " Future digital economy: a chance for competitive and innovative European entrepreneurs and organisations?"

Moderator:

Hans Rijckenberg

Discussed topic:

Standardization

Proposed actions: What can be done at EU level to address the discussed topic

action 1 Build alliances with international organizations like W3C and IETF

action 2 define the federated authentication and authorization for the internet, smart phones and wider

action 3 make European standards global, such as in the succesful case of GSM

action 4 Create European Digital Passport and/or Certificate

action 5 EU funded projects should contribute for standards

Workplan for action:

1. Milestone 1: detailed to do list

2. Milestone 2: initial status report on the progress done (est. December 2011)

3. Milestone 3: second status report on the progress done (est. March 2012)

4. Milestone 4: final report on the progress done and challenges ahead (DAA2012 est: June 2012)

Coalition for action:

List the people who wants to be part of the coalition for action to mobilise stakeholders' actions to make further progress in the three proposed actions mentioned above or those who wants to be informed about the progress done
